General Specifications

Model FU20-FTS and FU20-MTS
Differential pH/ORP sensor

GS 12B06J03-05EN-P

Overview

The FU20-FTS and FU20-MTS are successful developments in pH sensor technology, available from Yokogawa. This sensor has the measuring technology from the differential sensor and the ruggedness of the appreciated wide body FU20 design in one product.

Most pH sensors use silver/silver chloride reference cells with an open junction to the process. With the differential technology, the junction is not in direct contact with the process. For many applications, this is beneficial because you will not poison silver/silver chloride reference. In a wide range of applications, this solution has proven very effective and remains a cost-effective solution.

Lifetime of the conventional sensors is dependent on regular maintenance of the pH probes. Regular cleaning is required to eliminate reference poisoning. 70-80% of industrial users will fully benefit from using differential sensor technology in their high temperature and pressure applications.

Example applications:

- Electrolysis of brine in Chlorine manufacturing
- Flue gas desulphurization (scrubbers)
- Desalter in crude oil
- Quench tower
- Sugar, 1st and 2nd carbonation tower
- MgCl2 / CaCL production
- Pulp stock and stock water for Pulp and Paper
- Fermentation tank for bio-ethanol production

Features

In the differential pH measurement solution provided by Yokogawa below features deliver benefits in customers' applications:

- No junction
- No open connection from the process to the inside of the sensor
- No possibility of the poisoning reference element
- No use of diaphragm; hence no issues of plugging or coating of junction diaphragm
- No outflow of electrolytes, so no depletion issues
- NEW FU20-MTS optional with EPDM O-ring and FFKM sealing
- Any angle of installation, including upside down mounting for all VP/VS models

■ 1. General Specification FU20

This version encompasses the benefits of the cation reference into a PVDF rugged body with a ¾" NPT. The wide body sensor (26mm diameter) holds four separate measuring elements in one unbreakable and chemical resistant PVDF body. The FU20-FTS is targeted for those applications where the cation differential reference is the best solution but needs a more durable body than a 12mm glass.

1.1 Measuring elements

Sensor type	: Na glass electrode
	: pH glass electrode
Reference system	: Silver Chloride reference
Electrode type	: Solid Platinum electrode
Temperature sensor	: Pt1000 temperature sensor

1.2 Construction materials

Wetted parts

Sensor body	: PVDF - GF25
Earthing pin	: Solid Platinum
Measuring sensor membrane pH	: L-glass
Measuring sensor membrane pNa	: Na-glass
LE glass tube	: AR-glass
O-ring	: FTS - Viton
	: MTS -EPDM, FFKM
Body inert	: PVDF

1.3 Functional specifications (at 25°C)

Isothermal point	: pH 7, pNa 0
Reference system	: Salt sensitive Ag/AgCl in 1M KCl
Glass impedance	: nominal 750MΩ
Liquid outlet	: Non flow no junction
Temperature element	: Pt1000 to IEC 751
Asymmetry potential	: 0 ± 15 mV
Linearity PH (Slope)	: > 90 % in pH 2-12 with pH = pNa+2

Note: The temperature sensor included in the FU20-FTS-MTS is designed for process compensation and indication. It is NOT designed for process temperature control.

1.4 Dynamic specifications (at 25°C)

Response time pH step (7 to 4)	: < 15 sec for 90%
Response time temp step (10°C)	: < 120 sec for 90%
Stabilization time (0.02 pH unit/10 s)	: < 2 minutes

1.5 Operating range

pH	: 2 to 14
ORP	: -1500 to 1500 mV
Temperature	: 0°C to 105°C (14°F to 221°F)
Pressure	: 1.5 kPa …500 KPa (0.015…5 Bar / 0.21…72.5 psi
Conductivity	: > 10 µS/cm

1.5 Enviromental conditions

Storage temperature	: -10 to +50 ºC (14 to 122 ºF)
Ingress Protection	: IP67 (conform IEC 60529)

Note: The pH operating range at room temperature is 2-14pH, but high temperatures will seriously shorten the lifetime outside the 2-12 pH range.

Note: The upper process temperature for the intrinsically safe version is limited by the ambient temperature (Tamb.) defined for each temperature class (T3, T4, T5 and T6)

Regulatory Standards

Remarks:

1. EU Directive 2011/68/EU applying: Article 4.3: Sound Engineering Practice

Warning: Damaging the screw thread of the sensor might influence the maximum process pressure.

2. EU Directive 2011/65/EU and Commission Delegated Directive (EU) 2015/863 amending Annex II, applying Annex IV as regards the application of the sensors, detectors and electrodes per EN-IEC 63000: 2018

3. EU directive 2012/19/EU

This sensor is intended to be sold and used only as a part of equipment which is excluded from the WEEE directive, such as large-scale stationary industrial tools, a large-scale fixed installation etc., and therefore it is in principle fully compliant with WEEE directive.The sensor should be disposed in accordance with applicable national legislations/regulations respectively.

4. Low Voltage as per ANSI/ISA 61010-1:2012 and CAN/CSA C22.2 No. 61010-1:2012 (R2017)

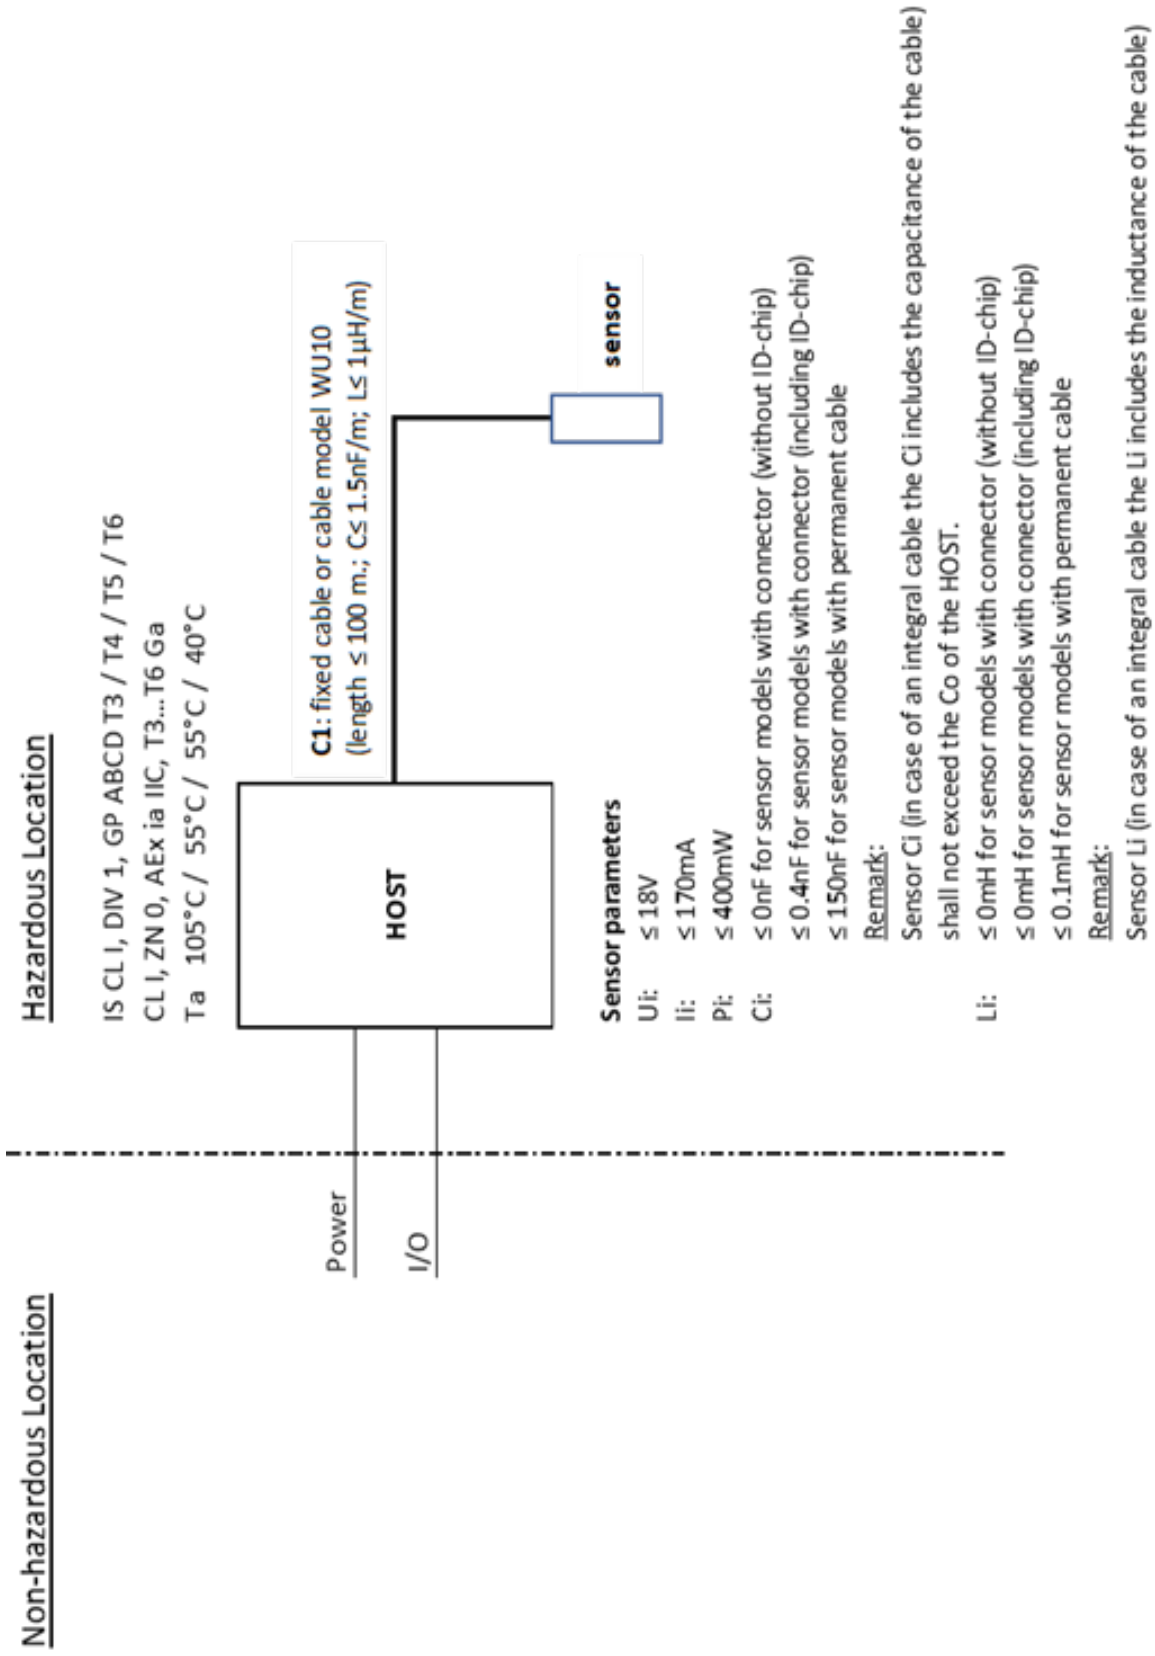
Addendum 3: Control Drawings

Control drawing: D&E 2020-023-A50 (part 1)



Remarks:

1. No revision to this drawing without prior approval of FM.
2. Installation must be in accordance with the National Electrical Code (ANSI/NFPA 70), ANSI/ISA-RP12.06.01, and relevant local codes.
3. The sensor shall be installed to a certified intrinsically safe HOST with the following maximum values: Uo= 18 V, Io = 170 mA, Po = 400 mW.
4. The sensor does not provide isolation from earth. Installers shall take necessary measures to prevent the possibility of sparking resulting from differing earth potentials between the sensors and interconnecting equipment. This can be realized for example by selecting interconnecting equipment which provides input-to-output and input-to-earth isolation up to 500 V rms.
5. Sensor Model code:

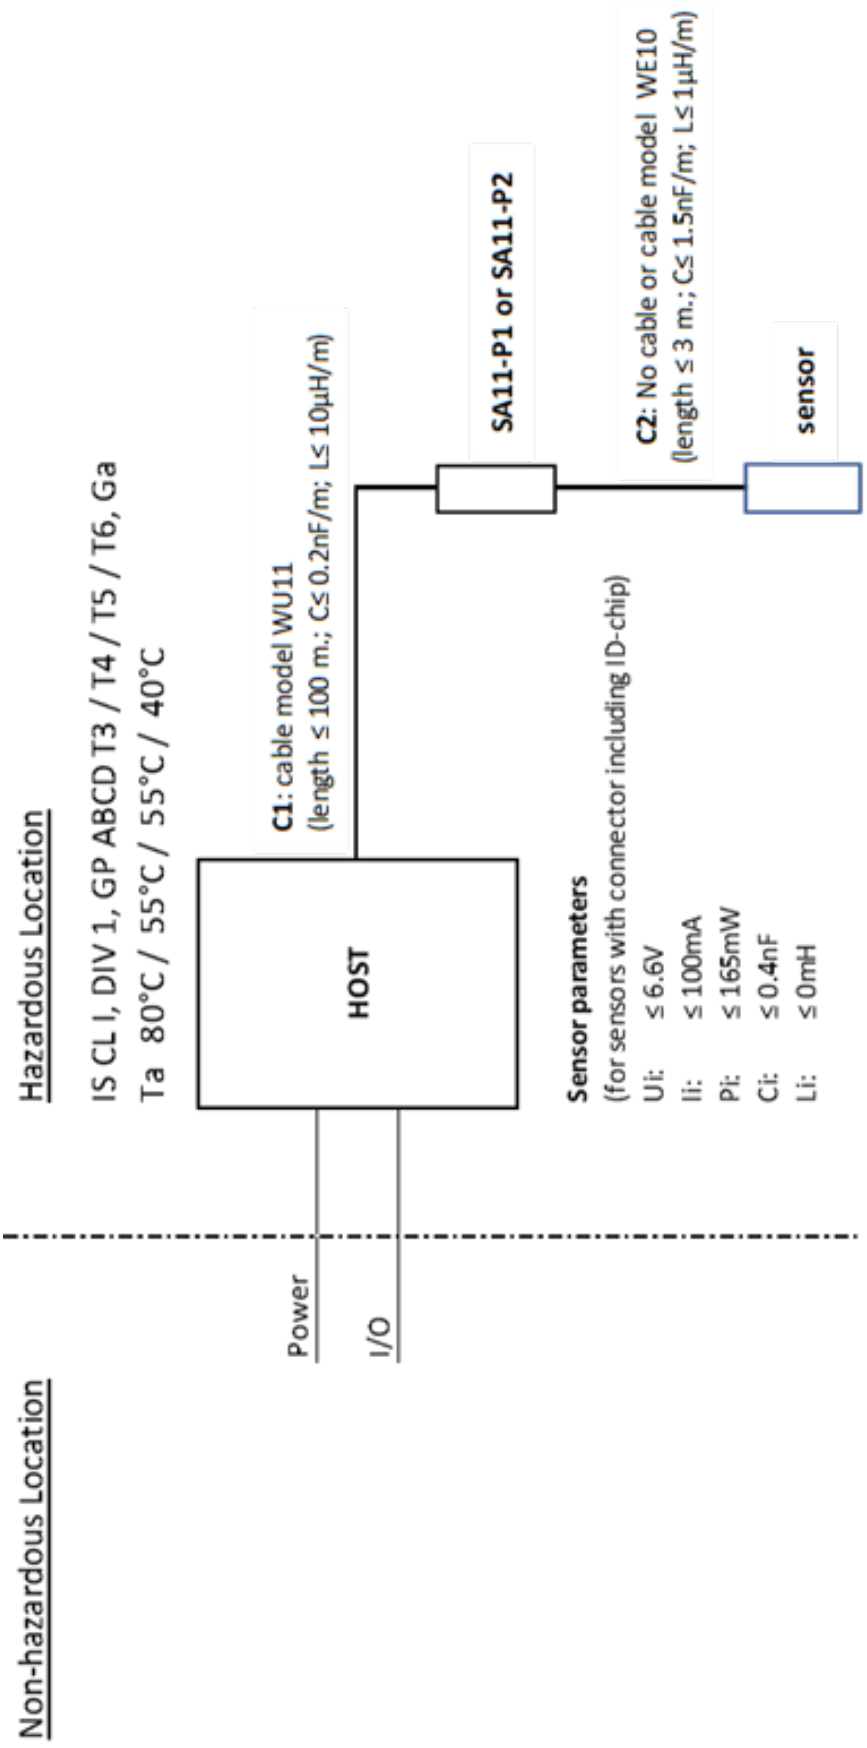
Model	Suffix Codes	Option Codes	
FU20	-ab-cd-efg	/h	
ab	Connection type:	Two alphanumeric characters identifying the length of the permanent cable, each character from 0 to 9	
		VP	Connector without ID-chip
		VS	Connector with ID-chip
cd	Temperature sensor + Region:	T1	Pt1000, IS for ATEX/IECEx, FM-US, FM-CAN
efg	Type:	FTS	PVDF body / Tapered Thread / Dome shaped / Sodium-ions sensitive membrane / Silicon&Viton sealing
		MTS	PVDF body / Tapered Thread / Dome shaped / Sodium-ions sensitive membrane / FFKM&EPDM sealings
		RTS	PPS body / Tapered Thread / Dome shaped / Sodium-ions sensitive membrane / Silicon&VITON sealings
h	Option code:	Up to ten alphanumeric characters	
		(A to Z, 0 to 9 or hyphen)	

6. WARNING - POTENTIONAL ELECTROSTATIC CHARGING HAZARD – SEE INSTRUCTIONS

- pH sensors containing accessible plastic parts and/or external conductive parts, must be installed and used in such a way, that dangers of ignition due to hazardous electrostatic charges cannot occur, especially in the case that the process medium is non-conductive.

Control drawings:

Control drawing: D&E 2020-023-A50 (part 2)



Remarks:

1. No revision to this drawing without prior approval of FM.
2. Installation must be in accordance with the National Electrical Code (ANSI/NFPA 70), ANSI/ISA-RP12.06.01, and relevant local codes.
3. The sensor shall be installed to a certified intrinsically safe Smart Adapter, model SA11-P2 with the following maximum values: Uo= 6.6 V, Io = 100 mA, Po = 165 mW.
4. The installers shall take necessary measures to prevent the possibility of sparking resulting from differing earth potentials between the sensors and interconnecting equipment. The sensor itself does not provide 500 V rms isolation from earth, the interconnecting equipment Model SA11-P2 Smart Adapter however provide this required isolation.
5. Sensor Model code:

Model	**Suffix Codes**	**Option Codes**	
FU20	-ab-cd-efg	/h	
ab	Connection type:	VS	Connector with ID-chip
cd	Temperature sensor + Region:	T1	Pt1000, IS for ATEX/IECEx, FM-US, FM-CAN
efg	Type:	FTS	PVDF body / Tapered Thread / Dome shaped / Sodium-ions sensitive membrane / Silicon&Viton sealing
		MTS	PVDF body / Tapered Thread / Dome shaped / Sodium-ions sensitive membrane / FFKM&EPDM sealings
		RTS	PPS body / Tapered Thread / Dome shaped / Sodium-ions sensitive membrane / Silicon&VITON sealings
h	Option code:	Up to ten alphanumeric characters	
		(A to Z, 0 to 9 or hyphen)	

6. WARNING - POTENTIONAL ELECTROSTATIC CHARGING HAZARD – SEE INSTRUCTIONS

- pH sensors containing accessible plastic parts and/or external conductive parts, must be installed and used in such a way, that dangers of ignition due to hazardous electrostatic charges cannot occur, especially in the case that the process medium is non-conductive.

FM-Canada

Applying standards	: CAN/CSA-C22.2 No. 60079-0 CAN/CSA-C22.2 No. 60079-11
Certificate no.*	: FM20CA0062X IS CL I, DIV 1, GP ABCD, T3…T6 CL I, ZN 0, Ex ia IIC, T3…T6 Ga Control Drawing: D&E 2020-023-A51
Electrical data	: See Note 4.
Specific conditions of use	: See Control Drawing D&E 2020-023-A51.

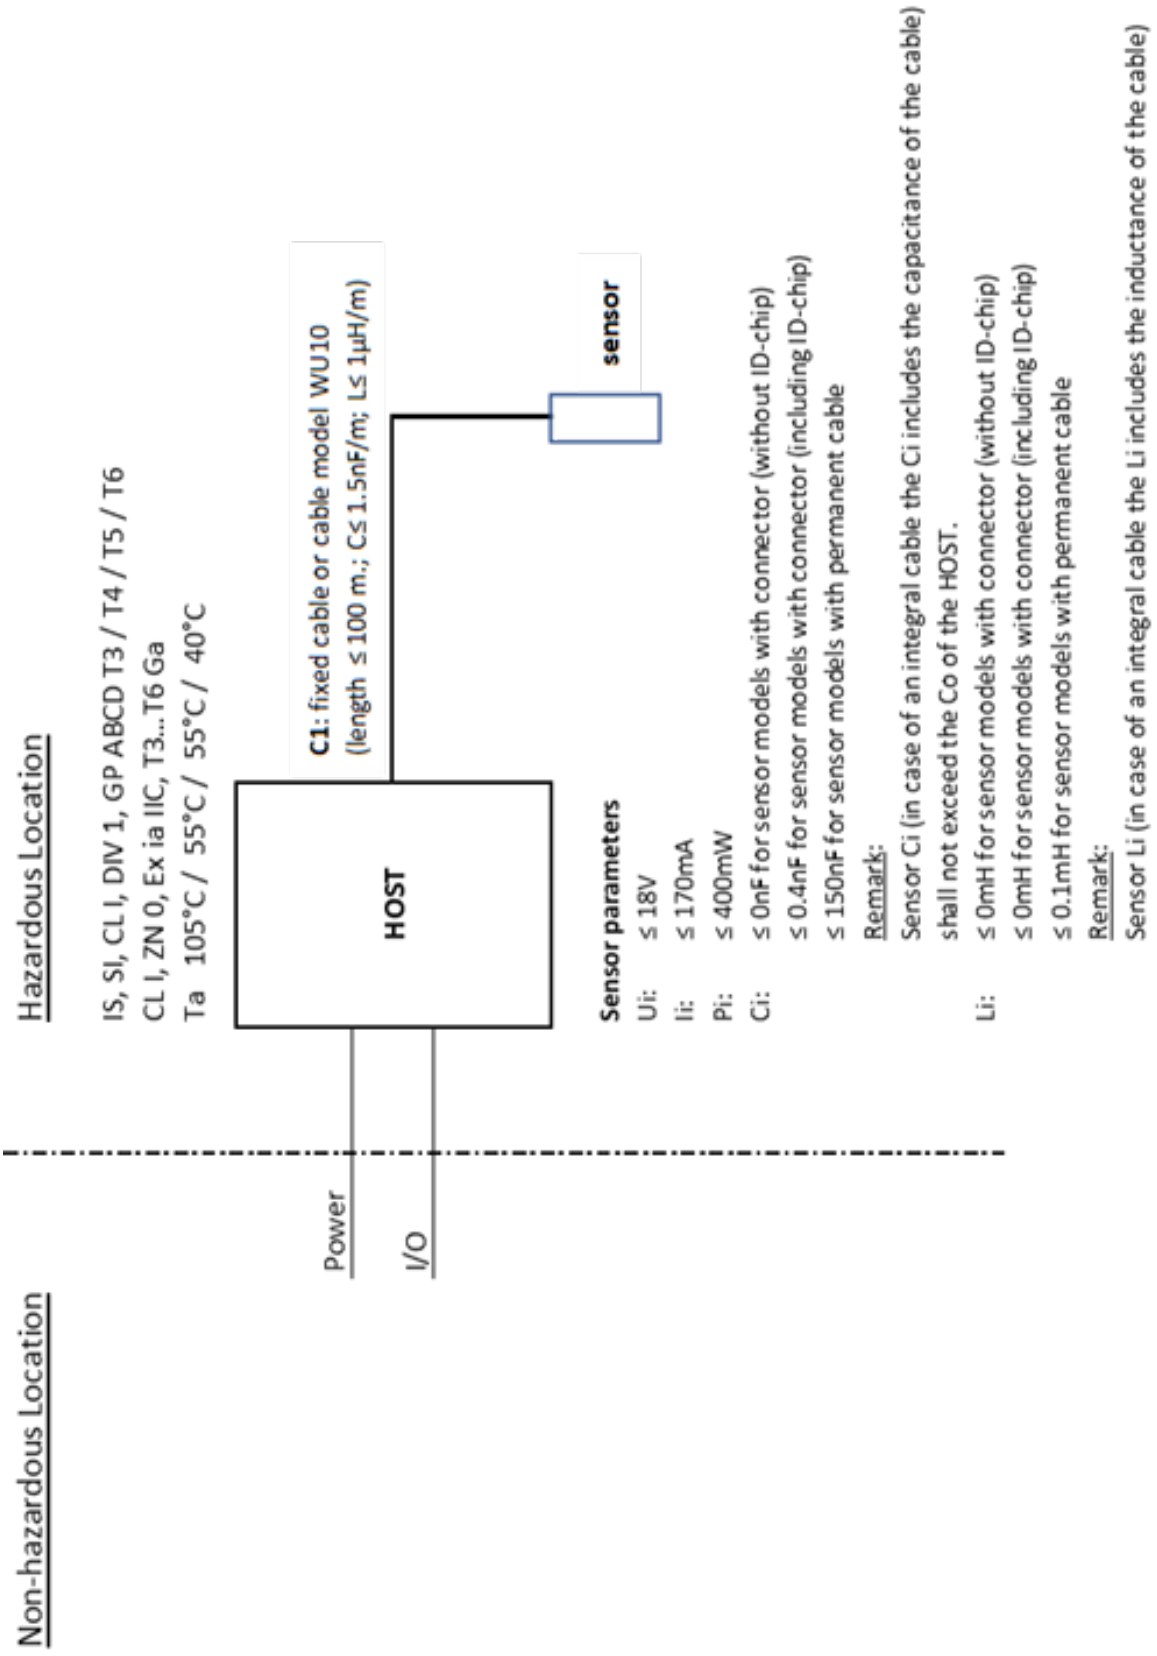
Note 4: Intrinsically safe, entity, for Class I, Division 1, Groups A, B, C and D;
Class I, Zone 0, Ex ia IIC, Ga (entity) for hazardous (classified) locations when installed per control drawing D&E 2020-023-A51.
Sensor input parameters:
Ui= 18V; Ii= 170 mA; Pi= 0.4 W;
Li= 0.1 mH (models with fixed cable) or Li= 0 mH (VS/VP type);
Ci= 150 nF (models with fixed cable) or
Ci= 0.4 nF (VS type) or Ci= 0 nF (VP type).

Ambient temperature:
-40 °C to +40 °C for temperature class T6,
-40 °C to +55 °C for temperature class T4 and T5,
-40 °C to +105 °C for temperature class T3.

When the sensor has been connected to non intrinsically safe equipment which exceeds the restrictions regarding the sensor input circuits, the sen sor is not suitable anymore for intrinsically safe use.

* Certification is subject to change, due to new regulations or changes in the product itself. When a certificate is updated, a new revision under the same certificate number is created with a new date.
- FM-Canada:
FM20CA0062X (effective from 03-2021)

Control drawing: D&E 2020-023-A51 (part 1)



Remarks:

1. No revision to this drawing without prior approval of FM.
2. Installation must be in accordance with the Canadian Electrical Code (CEC) CSA22.1, and relevant local codes.
3. The sensor shall be installed to a certified intrinsically safe HOST with the following maximum values: Uo= 18 V, Io = 170 mA, Po = 400 mW.
4. The sensor does not provide isolation from earth. Installers shall take necessary measures to prevent the possibility of sparking resulting from differing earth potentials between the sensors and interconnecting equipment. This can be realized for example by selecting interconnecting equipment which provides input-to-output and input-to-earth isolation up to 500 V rms.
